- (1) Gross leave corresponds to all gross wages and salaries without upper limit and without allowance for business expenses as they are taken into account to calculate the paid leave allowance.
- (2) The weather-related contribution is due on all salaries paid by the company (offices and construction sites), within the limit of the capped social security base. This contribution is to be paid only on the part of the wages exceeding the allowance.  
**Reminder :** *initially*, social security contributions were called on a capped base. This is no longer the case today, where social security contributions are called on the entire salary, with the exception of the old age insurance contribution.  
Subsequent changes to the social security contribution system had no impact on the weather-related unemployment contribution base. This is therefore made up of all salaries paid taken into account within the social security upper limit.  
Decree number 2002-655 of 29 April 2002 now gives the CIBTP France Board of Directors the option to call for weather-related unemployment contributions at a reduced rate. The rates were thus called at 70% until the 65<sup>th</sup> season (01/04/2010 to 31/03/2011). As of 1st April 2011 (66th season), the CIBTP France decided to call rates at 100%.
- (3) However, when calculating the annual adjustment, account must be taken for the neutralisation of bad weather and leave periods.
- (4) The full OPPBTP rate (0.11%) as well as the reduced rate (66% of the full rate) were set by Decree of 4 July 1985 and have since been renewed by successive decrees. It should also be remembered that the CNETP covers the increase of 13.14% corresponding to the paid leave allowance.
- (5) Decree number 99-884 of 18 October 1999 introduced a contribution to the OPPBTP for the employment of temporary workers. This contribution is based on a reference hourly wage set by decree (€ 13.77 from 1<sup>st</sup> January 2023).
- (6) The base for this contribution is made up solely of salaries paid for activities carried out in the eight departments of Ile-de-France (75, 77, 78, 91, 92, 93, 94, 95) excluding Seine-et-Marne (77) for the building industry.  
A fixed annual information fee is also called upon to cover costs for publications sent to member companies concerned.
- (7) The base for this contribution is made up solely of salaries paid for activities carried out in the six departments of the Provence region (04, 05, 06, 13, 83, 84).
- (\*) If the base > 2 million euros : rate at 0.45%.
